#### **INTRODUCING THE XHR311...**

The XHR311 is a piston-sensed, dual-heated pressure regulator, designed to maintain sample liquids and gases in their vapour state.

Certified to ATEX directive 2014/34/EU, its two 100W heater cartridges, are inserted in helical machined sheaths, which agitate the media to help with heat transfer and analysis process. Alternatively, the steam-heated option replaces the heater cartridges with steam tubes.

The propriety PCB is easy to wire and incorporates a potentiometer to adjust the heater temperature setting, and independent channel isolation switches for liquid sampling.

Its electrical enclosure meets the requirements of IP66.
